

## W9 Quick Setup Manual

### 1. Install a driver

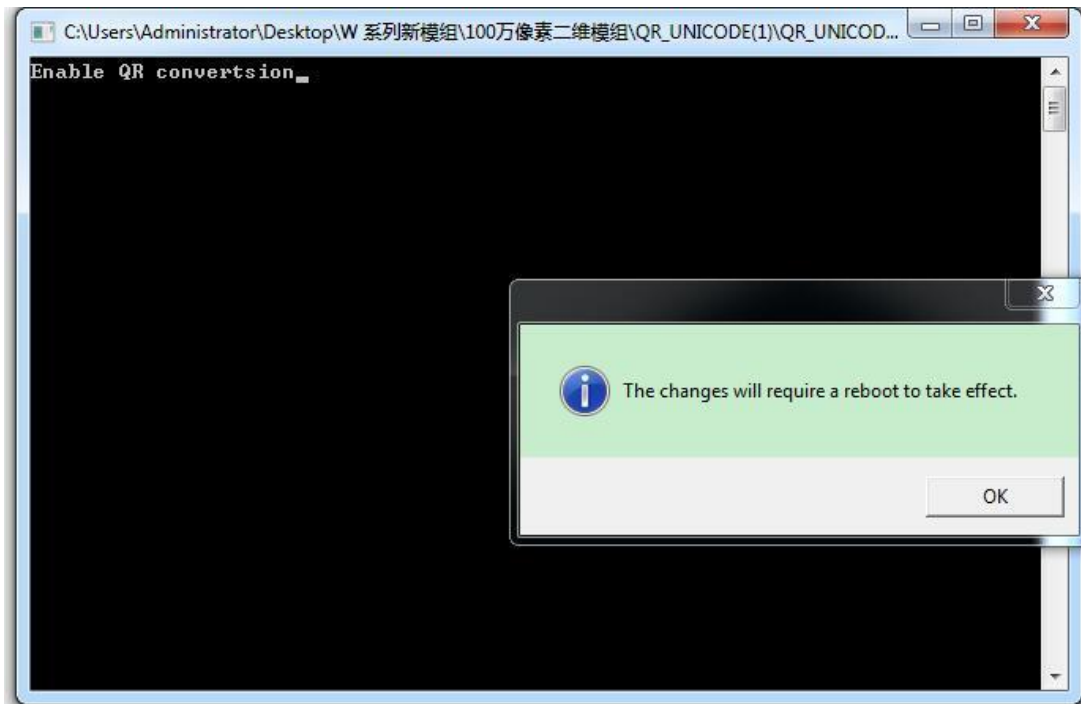

①. Install the a driver, you can download it from below link.

[https://gzxlscan.com/download/Driver\\_for\\_W9.rar](https://gzxlscan.com/download/Driver_for_W9.rar) (Safe file)

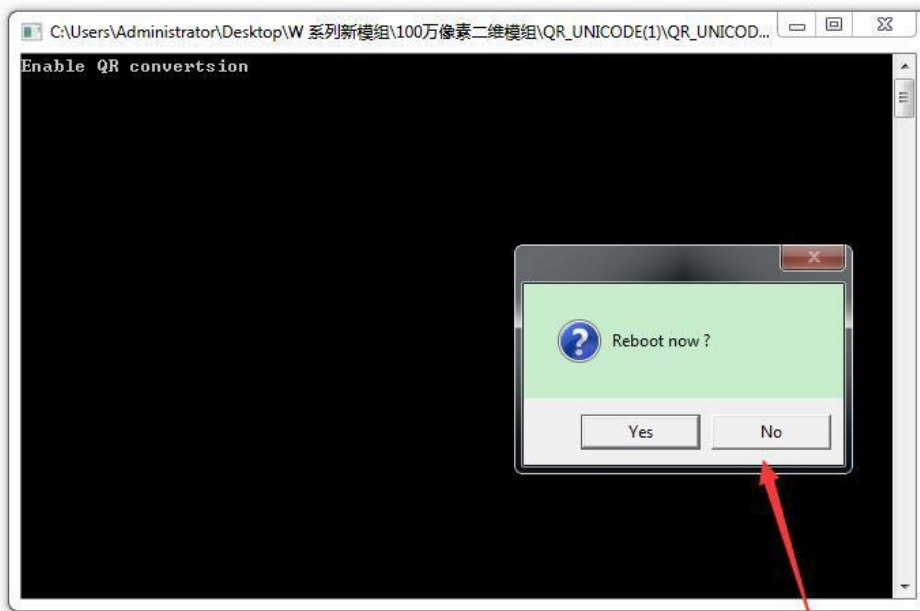

Some anti-virus software might block it.

②. Double click the driver (QR\_UNICODE).

③Click " No" to finish the whole installation .

**Note: Please make sure your system language is same as your window language.**

For example:

Follow below path to check your system language:

Control panel → Change Display Language → Change system Locale → Current System Locale

If your system language is German, make sure your window language is DE

## 2. Set the keyboard language.

Here we take Germany Keyboard for example.

① Scan "Enter Configuration"

Enter Configuration

② Scan "Germany Keyboard"

Germany Keyboard

③Scan "Exit Configuration"

Exit Configuration

If you use other types of keyboard please refer to below keyboard languages.

UK

French

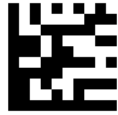

German

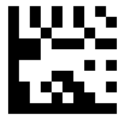

Japan

Hungary
